

G. Barroeta - M. D. San Luis Potosí - México

Prof. Asa Gray.

Botanic Garden - Edgemoor

29. April 1878.

Dear Sir

I wish to remind you our
meeting at your office in the
Botanic Garden

I am happy in being
able to send you by this
mail two small sacs of
seeds, the one is *Schinus*
molle, the other the *Pinus*
Piñon - The *Schinus* is a
tree whose common name

in this country is "Arbol
del Peru - Peruvian tree -
Native from Peru grows now-
everywhere in México--.

Honoured with the visit
of Dr. C. C. Parry, who gives
me the sacs - and prays me
to present you his respects,
I will make to-day like a
proof, if the seeds can
reach your home by
post.

I expect your

orders and I have the
honour to remain your
affectionate friend
G. Barroeta.
